Guest Speaker: Dr. Mark Bolding

Established in 1989, the UAB Civitan International Research Center has strived to empower families and children with or at risk for developmental disabilities. The Center has forged a legacy of world-class research focusing on the wonders of the human brain and its role in health and disease across the lifespan. Dr. Bolding will provide an overview of the Research Center and its innovative Neuroimaging Laboratory. The Center's scientists are unraveling the mysteries of numerous disorders such as autism, cerebral palsy, Rett syndrome, brain cancers, Alzheimer's disease, Parkinson's, dementia, injuries and rare disorders of the brain.

Dr. Bolding is a medical imaging physicist in the University of Alabama at Birmingham Department of Radiology, and Director of the Civitan International Neuroimaging Laboratory. With his significant experience in human neuroimaging, especially neuroanatomical and functioning imaging, he has designed protocols for more than 40 studies in human volunteers and/or clinical populations. Learn how the UAB Civitan International Research Center is dedicated to translating the amazing discoveries of scientists into treatments, cures, and knowledge that can benefit families and children around the world.
