

KIDS FOR CAMP
A Program of Autism Pensacola

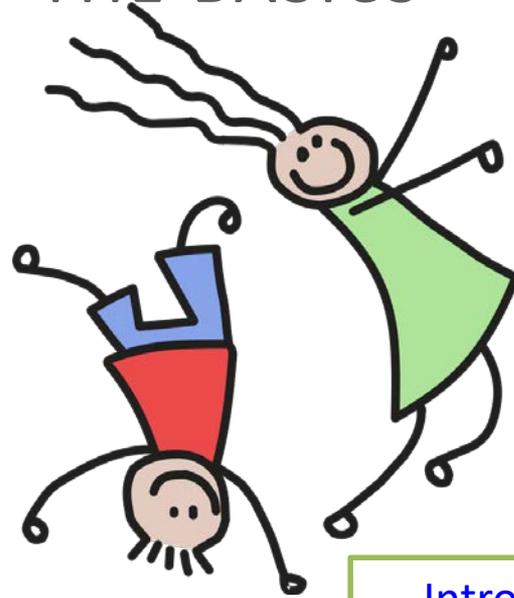

Camp By The Numbers

- Founded in 2003
- First Learning Lab in 2007
- To date, we have provided training for more than 320 educators and served more than 305 individuals with autism

Doing “What Works” APPLIED BEHAVIOR ANALYSIS - THE BASICS

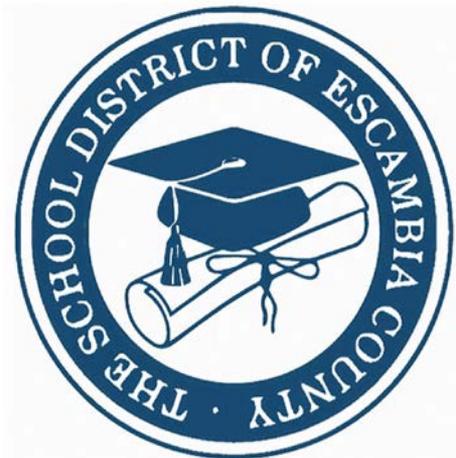

- Understanding (and modifying) behavior in the context of environment is the basis for ABA therapies.
- ABA uses **positive reinforcement** in a way that can be measured in order to bring about meaningful behavior change.
- **Verbal Behavior** motivates a child, teen, or adult to learn language by connecting words with their purposes.
- **Natural Environment Teaching (NET)** is used at camp to teach targets. NET is teaching away from the table.
- Camp focuses on the main skill deficits for most with autism: **Communication and Social Skills**
